- Liquidity Locked: > 50% via PinkLock
- Total Liquidity (PancakeSwap V2): ~172M BABEDINO
- Multiple lock periods ending in 2025 and 2026
- Creator wallet: <5% of total tokens and <0.01% LP

BABEDINO Token Smart Contract Security Statement

Important Note:

All whitelist and potentially unsafe functions were rendered inactive once the contract was renounced. This status can be confirmed via BscScan "Read Contract" section. We kindly ask platforms using automatic scanners (GoPlus, TokenSniffer, etc.) to update their data accordingly.

This document is officially published by the BABEDINO project team to clarify smart contract security status and ensure trust across third-party scanner platforms.
